# LABYRINTH IN THE LIBRARY

**By Penzak Productions**

***A fun, action-packed adventure that celebrates the power of reading and literature.***

It's 1983 and young Hugo, unable to stop playing a game on his father's new laptop computer, steals it and hides it in his school library.

Suddenly the bookcases spin him into a dangerous maze. Not only is Hugo trapped but a Golden Robot escapes from the computer game and starts eating the books!

Helped by Merlin the Wizard, Hugo must use the three books he's read – Peter Pan, The Sword in the Stone, and The Lion, The Witch and the Wardrobe, to discover his love of books combined with the creativity of computers, to save the library and find his way home.
