TINY DOCTORS

By Happy Labs

A musical, interactive theatre lab where kids mix potions and learn the magic of emotions!

A joyful theatre experience for children where feelings are explored, friendships are celebrated, and happiness is brewed ... literally!

This interactive musical theatre performance takes place in the Tiny Doctors Research Centre. Children are invited to become Tiny Doctors, putting on their own lab coat to investigate what makes us feel good inside.

Tiny Doctors is designed to promote emotional wellbeing, self-expression and social connection in a way that's fun, memorable and accessible — perfect for schools, families and little scientists with big hearts.
